Surton

Fullstack Developer

Remote
June 2024 to Current

- Frontend Development: Developed and maintained responsive user interfaces using React, ensuring seamless integration with backend services.
- Backend Development: Built and optimized RESTful APIs using FastAPI, enhancing the performance and scalability of server-side applications.
- SDK Maintenance: Managed and updated a Python SDK, providing robust and efficient tools for internal and external use.
- End-to-End Development: Collaborated closely with founders to define project requirements, executed tasks from concept to completion, and conducted thorough testing to ensure high-quality deliverables.

Worthwhile

Frontend Engineer

Remote
Feb. 2022 to June 2024

- Collaborate with cross-functional teams to deliver products that maximize client ROI, enhancing overall user satisfaction and engagement.
- Design and maintain reusable UI templates, accelerating development for future client projects and ensuring consistency across applications.
- Develop web and mobile apps using Vue, React, and React Native.
- Create end to end and unit tests with Vitest and Cypress to validate application functionality, and improve code reliability.
- Regularly meet with clients to gather requirements, and communicate progress or delays.

Armadillo Power

Freelance Full Stack Engineer

Remote
2020 to 2022

- Design and develop a front end using React.js to allow users to authenticate and interact with Armadillo Power web tools
- Develop a robust set of web tools for Armadillo Power.
- Develop a back end using Node.js that interacts with a Postgres database to hold user information, and access to other web based tools.
- Display GEOJSON data on an interactive map based on user parameters.

» Projects
